# **Rotary Evaporator**

Highly efficient standard rotary evaporator with manual lift

# RE202-A/212-A (basic) REV202M-A/212M-A (with vacuum controller)

Evaporating / receiving flask 100 ml to 2L / 1L (Standard) 5~315 rpm RT +10~90°C / RT +10~180°C

#### Features

• 5 ~ 315 rpm rotation speed range
Turning the encoder dial slowly increases or decreases the value by 1, turning it quickly changes the value by 10.

Selectable rotation mode (forward, reverse, auto reverse) RPM display brightness can be adjusted in 8 levels.

### Set inversion function

Glassware and bath can be set in either side, left or right, depending on user's dominant hand and installation location.

Three units of Glassware B (with vertical condenser) can be installed in a standard fume hood.

### Uniquely designed glass condenser

This prevents liquid stagnation and backflow improving durability of vacuum seal

When using ketone or ether solvents, standard vacuum seal swells. It is recommended to use PTFE vacuum seal.

### Two types of baths

Option for water and oil bath.

Large capacity 5L bath with 240mm I.D. and a full complement of safety functions such as automatic overheat prevention and temp. upper limit difference.
